

Green Mountain Energy Company Electricity Facts Label for Pollution Free™ Electricity
Effective Date: May 2014

Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. This Electricity Facts Label reflects the estimated percent of sales based on the primary fuel source used in the generation of electricity for the *Pollution Free* electricity product in Pennsylvania.

Resource Type	This Product	PJM Region for Comparison ¹	Generator Location
<i>Non-Renewable Sources</i>			
Coal	0.00%	44.43%	
Nuclear	0.00%	35.12%	
Gas	0.00%	16.40%	
Oil	0.00%	0.19%	
Other	0.00%	0.00%	
<i>Renewable Sources</i>			
Wind	100.00%	1.88%	United States
Hydro	0.00%	0.97%	
Solid waste	0.00%	0.52%	
Captured methane	0.00%	0.29%	
Wood or other biomass	0.00%	0.15%	
Solar	0.00%	0.05%	
Total	100.00%	100.00%	

¹PJM system mix data for January – December 2013, as published on the PJM Environmental Information Services website (<http://www.pjm-eis.com/>).

After each calendar year, an independent auditor will verify the energy sources used to supply the *Pollution Free* electricity product meets stated product requirements and that the renewable energy attributes are not sold more than once. Information concerning energy sources used in Green Mountain products will be included in the annual licensing report provided to the Pennsylvania Public Utility Commission (PUC). This report will be available upon request after submission to the PUC. Information regarding energy efficiency is available upon request from the PUC or your electric distribution company. Information on environmental impacts or personal historical billing data is available upon request.

With the purchase of the *Pollution Free* electricity product, you are supporting cleaner electricity by offsetting 100% of your annual paid electricity usage with an equivalent amount of energy produced by the renewable energy sources indicated above. Green Mountain will purchase and retire renewable energy certificates representing the environmental attributes associated with the applicable amount of renewable energy produced from renewable energy facilities in the United States. You will not have electricity from a specific generation facility delivered directly to your service address, but your purchase ensures that renewable energy equal to the applicable percentage of your paid electricity usage is annually produced using domestic renewable resources. We may take up to three months following the close of the calendar year to make up any deficiency in the renewable resource content for your electricity product. See your disclosure statement or sales agreement for further information. For additional information or to obtain a copy of your disclosure statement or sales agreement, please call Green Mountain Energy Company at 1-800-286-5856.
